PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 3+ years of experience developing enterprise applications for production environments. Experienced in designing and building scalable web applications, RESTful APIs, and system integrations that support business-critical operations. Contributed to the development of enterprise solutions including e-commerce platforms, document management systems, digital signature solutions, and e-Tax Invoice / e-Receipt (EVRT/EPP10) systems integrated with the Thailand Revenue Department via secure RESTful APIs. Strong expertise across frontend and backend development, database optimization, AWS cloud services, Docker, and CI/CD workflows using GitHub Actions and GitLab CI to deliver reliable, maintainable, and scalable software.

KEY HIGHLIGHTS

- Enterprise application development (e-commerce, workflow, document management systems).
- e-Tax Invoice / e-Receipt (EVRT/EPP10) integration with Thailand Revenue Department systems.
- Developed transaction-safe systems supporting high-concurrency business operations.
- RESTful API architecture for enterprise system integration.
- Database performance optimization using query tuning and indexing strategies.
- AWS cloud services (Lambda, S3, CloudWatch).
- CI/CD workflow execution using GitHub Actions and GitLab CI (build, deployment execution & monitoring).
- Code quality improvement through unit testing, refactoring, and performance optimization.

WORK EXPERIENCE

Brainergy Co., Ltd. | Full-Stack Software Engineer

Mar 2026 - Present

- Developed features for enterprise document management and digital signature systems.
- Developed e-Tax Invoice / e-Receipt (EVRT/EPP10) features integrated with the Thailand Revenue Department via RESTful APIs.
- Processed enterprise documents in PDF, XML, and JSON formats.
- Implemented AWS Lambda for batch processing and Amazon S3 for file storage.
- Supported CI/CD workflows using GitHub Actions and GitLab CI.
- Improved system quality through unit testing, code refactoring, bug fixing, and performance optimization.

Advice IT Infinite Public Company Limited | Full-Stack Software Developer

Jan 2025 - Feb 2026

- Developed features for an enterprise e-commerce platform supporting high user traffic.
- Built promotion and campaign management systems based on business requirements.
- Designed RESTful APIs for product, order, and core business logic integration.
- Implemented transaction-safe architecture for concurrent user operations.
- Improved database performance through query optimization and indexing strategies.
- Refactored legacy systems to improve maintainability and reduce technical debt.

Sirindhorn International Institute of Technology (SIIT) | Web Developer

May 2022 - Oct 2023

- Developed internal systems to automate and digitize organizational workflows.
- Designed normalized database schemas with data integrity and validation rules.
- Integrated internal and external APIs across departments.
- Improved reporting performance through query optimization and execution plan analysis.

Military Service | Royal Thai Air Force

Nov 2023 - Nov 2024

TECHNICAL SKILLS

- Backend: Node.js (Express), PHP (Laravel, Codeigniter), Python (Django), C# (.NET)
- Frontend: React, Next.js, Vue.js (2 & 3), Nuxt.js, Angular, TypeScript, Tailwind CSS, Bootstrap
- API & System: RESTful API, System Integration, JWT, Role-Based Access Control, Transaction Management
- Database: PostgreSQL, MySQL, Microsoft SQL Server, Query Optimization, Indexing
- Cloud & CI/CD: AWS (Lambda, S3, CloudWatch), Docker, Git, GitHub Actions, GitLab CI
- Testing & Quality: Unit Testing, Code Refactoring, SonarQube

EDUCATION

Bachelor of Science in Computer Science | Khon Kaen University

Aug 2018 - Mar 2022
