PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience in backend development and enterprise application systems. Experienced in designing and developing scalable RESTful APIs, workflow systems, and system integration for production-grade business applications. Specialized in enterprise systems including e-commerce platforms, document management systems, digital signature systems, and e-Tax Invoice / e-Receipt (EVRT/EPP10) systems integrated with the Thailand Revenue Department via secure RESTful APIs. Strong expertise in database design, query optimization, and transactional system development for high-concurrency environments. Experienced with AWS cloud services, Docker containerization, and CI/CD workflows using GitHub Actions and GitLab CI for build, deployment execution, and system monitoring.

KEY HIGHLIGHTS

- Enterprise backend system development (e-commerce, workflow, document management systems)
- e-Tax Invoice / e-Receipt (EVRT/EPP10) integration with Thailand Revenue Department systems
- High-concurrency system design with transactional consistency and reliability
- RESTful API architecture for enterprise system integration
- Database performance optimization using query tuning and indexing strategies
- AWS-based processing using Lambda, S3, and CloudWatch
- CI/CD workflow execution using GitHub Actions and GitLab CI (build, deployment execution & monitoring)
- Code quality improvement through unit testing, refactoring, and performance optimization

WORK EXPERIENCE

Brainergy Co., Ltd. | Full-Stack Software Engineer

Mar 2026 – Present

- Developed backend services for enterprise-grade document management and digital signature systems
- Developed e-Tax Invoice / e-Receipt (EVRT/EPP10) system integrated with Thailand Revenue Department via secure RESTful APIs
- Processed enterprise documents in PDF, XML, and JSON formats for business workflows
- Implemented AWS Lambda-based batch processing and S3-based storage architecture
- Supported CI/CD pipeline execution for build, deployment execution, and production monitoring
- Improved system reliability through unit testing, code refactoring, and performance optimization

Advice IT Infinite Public Company Limited | Full-Stack Software Developer

Jan 2025 – Feb 2026

- Developed backend services for enterprise e-commerce platform supporting high concurrent traffic
- Built promotion and campaign management systems based on business requirements
- Designed RESTful APIs for product, order, and core business logic integration
- Implemented transaction-safe architecture for concurrent user operations
- Improved database performance through query optimization and indexing strategies
- Refactored legacy systems to improve maintainability and reduce technical debt

Sirindhorn International Institute of Technology (SIIT) | Web Developer

May 2022 - Oct 2023

- Developed internal systems to automate and digitize organizational workflows
- Designed normalized database schemas with data integrity and validation rules
- Integrated internal and external APIs across departments
- Improved reporting performance through query optimization and execution plan analysis

Military Service | Royal Thai Air Force

Nov 2023 - Nov 2024

TECHNICAL SKILLS

- Backend: Node.js (Express), PHP (Laravel), Python (Django), C# (.NET)
- Frontend: React, Next.js, Vue.js (2 & 3), Nuxt.js, Angular, TypeScript, Tailwind CSS, Bootstrap
- API & System: RESTful API, System Integration, JWT, Role-Based Access Control, Transaction Management
- Database: PostgreSQL, MySQL, Microsoft SQL Server, Query Optimization, Indexing
- Cloud & CI/CD: AWS (Lambda, S3, CloudWatch), Docker, Git, CI/CD (GitHub Actions, GitLab CI – build, deployment execution & monitoring)
- Quality Tools: Unit Testing, Code Refactoring, SonarQube

EDUCATION

Bachelor of Science in Computer Science | Khonkaen University

Aug 2018 - Mar 2022
